Introduction

Moloch

The **moloch** theme is a Beamer theme with minimal visual noise. It is a fork of the metropolis theme by Matthias Vogelgesang, which in turn was inspired by by the hsrm theme by Benjamin Weiss.

Enable the theme by calling

```
\documentclass{beamer}
\usetheme{moloch}
```

Sections

Sections group slides of the same topic by introducing a section page between them. A progress bar is shown which indicates how far along in the presentation you are.
